"We are Deals In:- CCTV Cameras-Fire Alarm panel-Access Control system-PA System-WLD-Rodent-Vesda "

ADD- H-NO -116 ,2ND FLOOR ,GALI NO -3 ,SURYA VIHAR-PART-3 SEHATPUR, FARIDABAD, HARYANA-121003

PH - 8802580311, Email ID – Harshpalrawat27@gmail.com

Our Valuable client:- National gallery of modern art (Delhi)

Indus valley partners (Noida)

Silver Arrow Automobile (Noida)

Apollo Hospital (Delhi)

Galgotias University (Greater Noida)

W.M (Gurgaon)

HDFC BANK (Gurgaon)

Haldiram Cafe (Indore)

Indus valley partners (Noida)

Din Engineering Services (Noida)

FBD One (Faridabad)

We deal in...

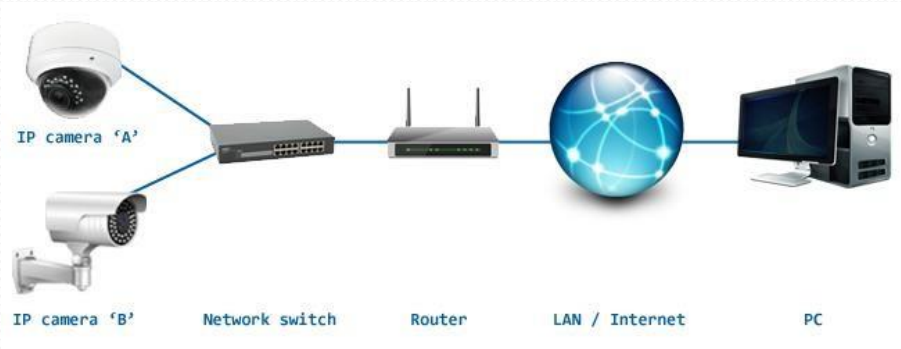
- Closed circuit television(CCTV)
- Public Announcement System
- Access control System
- Water Leakage Detecting System
- VESDA System
- Gas Suppression System
- Fire Panels
- Security control
- Rodent System
- IT & Management
- Fire fighting

- BMS

Closed circuit television(CCTV)

IP based CCTV.....

Capture images at higher resolution.
IP camera uses standard network.



Analog CCTV

Deal with...

Samsung , Hikvision, CP Plus , Dahua ,Honeywell, W-box , etc.

Public Announcement System

- A **public address system** (**PA system**) is an electronic **system** comprising microphones, amplifiers, loudspeakers, and related equipment. It increases the apparent volume (loudness) of a human voice, musical instrument, or other acoustic **sound** source or recorded **sound** or music.

Access control System

- In the fields of physical security and information security, access control is the selective restriction of access to a place or other resource while access management describes the process. The act of accessing may mean consuming, entering, or using. Permission to access a resource is called authorization.
- Deal with…

  Time Watch /Essl /Honeywell/Spectra

  HID etc.

Water Leakage Detecting System

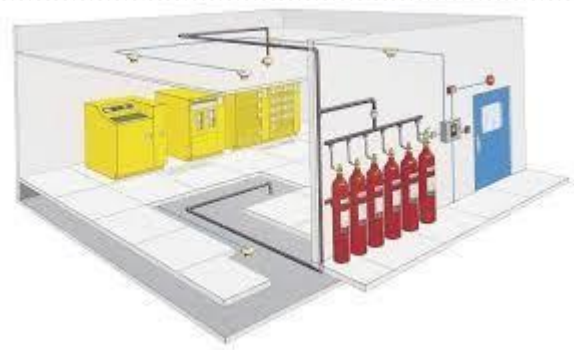
- A **water detector** is an electronic device that is designed to **detect** the presence of **water** for purposes such as to provide an alert in time to allow the prevention of **water leakage.....**The device then sounds an audible alarm together with providing onward signaling in the presence of enough **water** to bridge the contacts

VESDA System

- **VESDA Systems** are aspirating smoke detection used for early warning applications where response to a fire is critical. **VESDA**® works by continually drawing air into the pipe network via a high efficiency aspirator. A sample of this air is then passed through a dual stage filter.

Gas Suppression System

- **Gas suppression systems** extinguish fires by removing the oxygen content to below 15% where most materials **do** not burn. They are activated by a smoke detection **system** that detects the early presence of smoke. A high-quality **gas suppression system** means that water is not always essential to contain fires
- FM 200
- Clean agent
- Fire extinguisher



Fire Alarm panels

- They **work** by responding to changes in an electrical current, such as when a smoke detector identifies smoke and changes the current in response. Once the **fire panel** detects this current, it sounds the **alarm**. The conventional **fire panel** is installed in different zones—such as the first floor, second floor, etc.
- Deal with… Honeywell ,Est ,Apollo ,Agni , Ravel etc.

Security control

- Flap Barrier

- Turnstile

- Parking Barrier….

What is BMS?

A micro-processor based system which centralizes and simplifies…

- Šcontrolling
- Šmonitoring
- šoperation and…
- Šmanagement

…of heating, air-conditioning, ventilation & other building services to achieve…

- Temperature
- Moisture
- Circulation

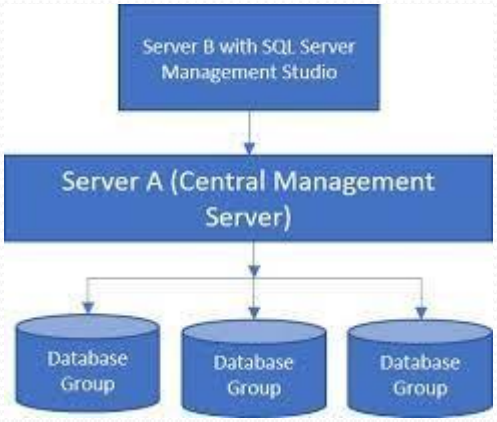
» **safe and comfortable working environment**
» **energy saving & efficient operation**
» **at reduced time & cost**

Rodent System

- The **rodent** managem ent gives protection from harmful insects and prevents costly damage done by pests or **rodents**. It not only gets rid of **rodents** but also provides safety to the employees and food products. In the **rodent** managem ent **system**, there are various devices which are equipped with ultrasonic technology.

IT & Management

- This includes **management** of computer and **server** operations, large amounts of **data**, services and applications, and the protection and security of the **data**.



Features of BMS…

- **System Security**
  - To prevent unauthorized use
  - Password protection
  - Operator specific access
  - Operator log summary

- **Alarm Management**
  - the presentation in the sequence of importance and time of.. Š
    - potentially dangerous situations Š
    - process value deviations
  - guiding the operator to take appropriate action through.. Š
    - audible and visual indications
    - ŠEmail, SMS
  - alarm summary
    - ŠTime, date, priority and description

- **Reporting**

- present customized subsets of data
- actual or historical state
- export as a word or excel document or..
- to a printer.

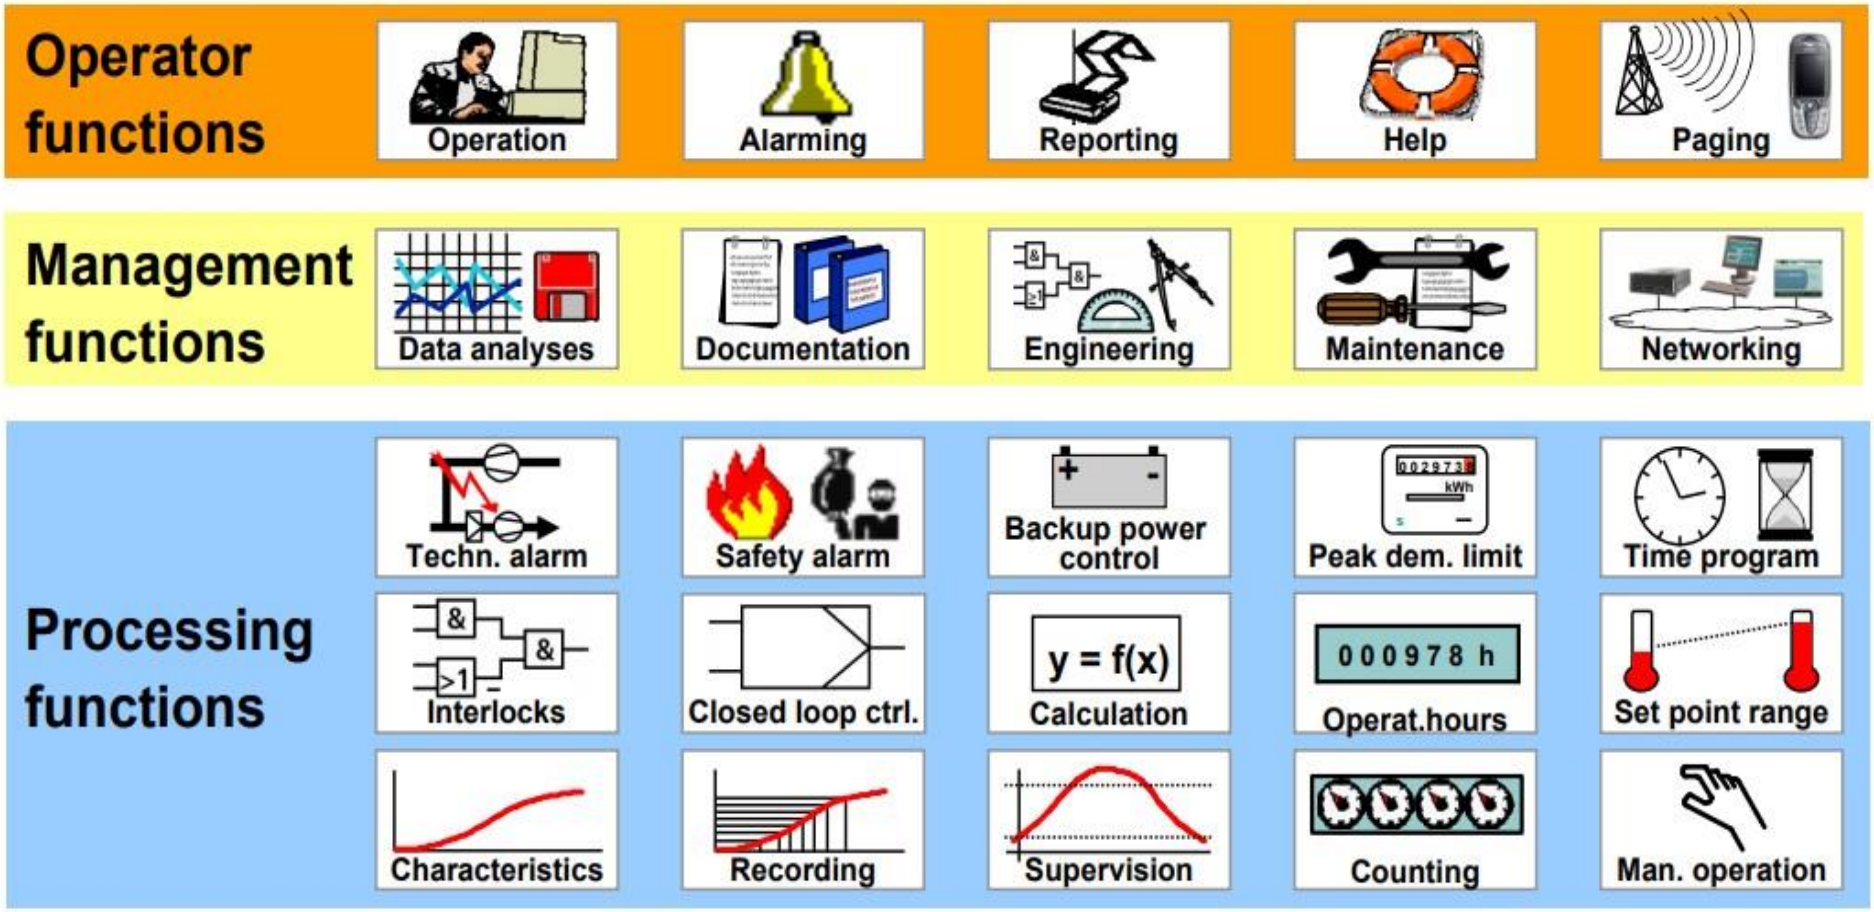
- **Data Logging**

- The automatic gathering and storage of data from the field equipment for later analysis and reporting
- Dynamically or historical
- Customized charts and graphs - Tabular reports

Time Scheduling

- time-based start/stop of the equipment
- saves energy cost and efficient operation
- effective for lighting, occupancy control
- can be as daily, weekly, for holidays or events

- **Event recording**

- automatic logging of operator activities and commands Š processes related to connected devices, workstations and printers.


Almost all applications in building automation are based on a common functionality
